2024 INNOVATION & HIGHLIGHTS

The story of Elite Pool Covers is one of innovation, expansion, and partnership.

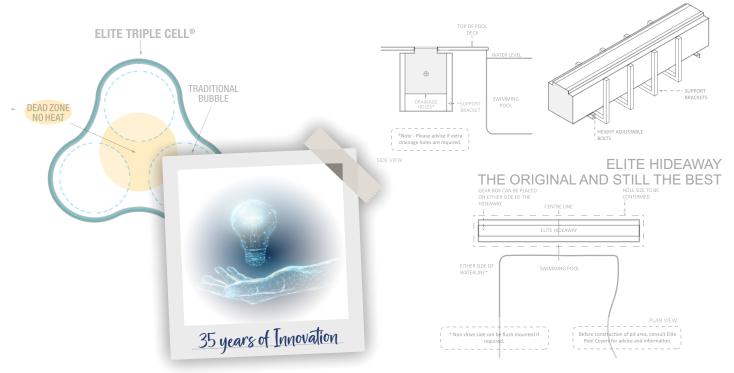

Founded in 1989, Elite began as a bespoke solution for Western Australian pool owners seeking more than just a cover; they wanted a custom-fit protector for their aquatic havens.

Over the years, Elite has expanded its offerings, catering to both custom jobs and standard bulk orders, ensuring every pool owner could find their perfect match.

In a strategic move to take Elite from a high-quality Western Australian company to a national powerhouse, the Long family joined forces with Elite. Their shared vision led to the establishment of a factory in Brisbane, expanding operations and bringing Elite's renowned products to more Australians than ever before.

Today, Elite Pool Covers & Rollers stands as a testament to Australian ingenuity, with a commitment to quality that has never wavered. As the company continues to grow and serve pool owners across the nation, the Elite story remains one of a relentless pursuit of excellence and a promise to deliver the best in pool protection.

With the Long family at the helm, Elite is poised to make waves in the pool industry for years to come.

SOLAR POOL COVERS

THE ULTIMATE TRIPLE CELL SOLAR POOL BLANKET MAKES OTHERS OBSOLETE

- Elite Triple Cell is the first purpose-designed and manufactured pool cover, breaking away from the traditional 'bubble wrap' style.
- Triple Cell is a cutting-edge technology that has revolutionized the way we collect solar energy.

 It is designed to capture the heat of the sun more efficiently, resulting in significant saving to energy costs.
- Elite Triple Cell also provides better all-round insulating performance due to its greater still 'air zone'.
- Elite Triple Cell lies smoothly on the pool surface and rolls up seamlessly over headers around the pool perimeter.

- Our darker-coloured Elite Super Bubble Ultra Heat blankets retain heat more effectively than standard lighter-coloured pool blankets, providing a warmer pool and extending the swimming season.
- Elite's Super Bubble Blanket is the best insulating blanket available due to its exceptionally large, high-bubble design that provides superior insulation.
- With its thicker design and durable bubble construction, Elite Super Bubble Salt Safe/Chlorine Safe blanket will outlast other round bubble blankets on the market.

ELITE DEBRIS DEFENDER

Keep leaves, debris and ducks out of your pool, all year-round with DEBRIS DEFENDER

Each cover is made with reinforced seams for a smooth finish and rope reinforced hem for strength.

Usually easily handled by one person, a Debris Defender cover folds away in its own storage bag when not in use. (Please note, this is not a safety cover.)

Why choose a DEBRIS DEFENDER?

- -Prevent the entry of leaves, debris, and small animals.
- -Helps to reduce build up of phosphates
- -Prevents approx. 70% of evaporation
- -Blocks sunlight and prevents algae growth
- -Reduces pool maintenance and cleaning time
- -Approx. 50% reduction in chemical consumption
- -May reduce electricity consumption
- -525 x 565 Denier micron thickness
- -High quality material, made in the USA
- -8 year pro rata warranty

REDUCES EVAPORATION

SAVES CHEMICALS

DRAMATICALLY REDUCES CLEANING TIME

COLOURS AVAILABLE:

BLUE

GREEN

GREY

TAN

BLACK

Save Chemicals

The Debris Defender allows the pool water to breathe, preventing a chlorine build up in your pool and can be left on the pool for extended periods of time. A normal solar blanket needs to be taken off the pool at regular intervals to allow the chlorine gases to escape. If not removed chlorine will build up and can bleach the lining of your pool and destroy the blanket.

Preventing the leaves and organic matter from entering your pool, will significantly reduce the chance of phosphate build up in your pool water, thus reducing the need to purchase phosphate remover.

Save Time on Cleaning

Installing a mesh cover on a pool can significantly reduce the amount of cleaning required. Any medium to large pieces of debris, such as leaves or grass that may blow onto a pool, will instead remain on top of the mesh cover and simply blow off the cover. A pool can remain clean all year round, with a pool mesh cover from Elite Pool Covers.

Save Money

With a mesh cover, a significant amount of money can be saved. Water evaporation causes an average pool to drain and be refilled one and a half times each year. The cost of refilling a pool is not cheap. A mesh cover can lower the evaporation rate and so save money. Elite Pool Covers proudly offers the best range of pool covers in Perth.

Easy to use

A DEBRIS DEFENDER cover is surprisingly easy to use. Removing the cover is easily done by one person, and takes around 10 minutes for most pools. Once the tension has been taken off the ropes, the whole cover lifts off (with the clips still attached), and there is nothing left protruding on the pool surround. When putting the cover back on, the pins are simply placed back into the holes and the rope tightened and re-locked – no tools required.

ELITE SAFETY COVERS

ELITE SUPER MESH SAFETY COVER

\$63 SQM

Ensure utmost peace of mind for pool owners with children and pets by opting for the Elite Super Mesh Cover.

With a strength that surpasses other materials by a staggering nine times, this remarkable cover ensures unparalleled security serving as a guard to protect the lives of small children and pets.

Whether you choose to utilise it throughout the year or solely during the winter months, it serves as a formidable barrier, effectively preventing any debris from entering a pool.

It's quick and easy to remove and replace, and has Elite's exclusive flush mounted inserts.

ELITE POOL PROTECTOR SAFETY COVER

Quick and easy to operate, this Elite Pool Cover offers wide ranging benefits. The Pool Protector serves as a safeguard for pools, providing a security barrier. Additionally, it helps minimise water evaporation and insulates the temperature of a pool, resulting in significant energy cost savings.

A built in roller, allows for the Pool Protector to be rolled on and off your pool in less than 3 minutes.

The Elite Pool Protector Safety Cover provides you with total peace of mind.

✓ In case of an emergency, the Elite Pool Protector can withstand the weight of a small child or pet.

SAVES CLEANING

- A clean pool all year round
- Debris that blows on, simply blows off
 Just cover and forget

SAVES MONEY

- ✓ Prevents evaporation

ELITE THERMAL SHIELD BLANKETS - 5mm

Elite Thermal Shield blankets have been designed specifically for heat retention and are ideal when the ambient air temperature drops below the pool water temperature.

SAVE ENERGY

SAVE WATER

Elite's lighter, longer lasting more thermal efficient closed cell AIRLON foam core outperforms other conventional thermal blankets.

ELITE THERMAL SHIELD™

Elite Thermal Shield™ delivers you more savings, a faster return and a much longer life on your pool blanket investment...

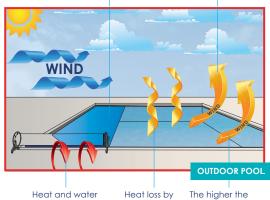

Elite Thermal Shield has a higher R-value than most other blankets (the higher the R-value, the more resistence to heat flow, the better your blanket performs), which means the pool will heat up quicker, stay warmer longer and best of all, be less expensive to operate.

Elite's 5mm Thermal Shield Blankets boast the highest R value available, providing optimal energy savings and maximizing your return on investment. Elite's 5mm Thermal Shield blankets feature the patented Airlon closed cell foam cores, effectively reducing water absorption by up to three times. It is important to note that blankets may become heavier and easier to tear in the case of high water absorption, resulting in decreased heat retention and a diminished long-term performance. Despite the higher cost of Airlon foam compared to standard foam, its long-term benefits result in a ten-fold return on investment, providing exceptional value for money!

Note: Elite's Thermal Shield has been tested to Australian/New Zealand standard AS/NZ 4859.1 R-value - 5mm - 0.15Kw

Heat loss by evaporation and convection 60%

is trapped in the pool

radiation into the air 30%

wind speed, the greater the heat and water loss

Need a roller to store your new cover? See page 12

At Elite, we understand the importance of enjoying your pool. That's why our team has created the state-of-the-art automated pool cover system – aquaroll, that can transform a good pool into an absolutely amazing one. With our system, you can keep your pool clean, safe, and ready for use at all times. So, dive into your pool with peace of mind and let our automated pool cover system take care of the rest!

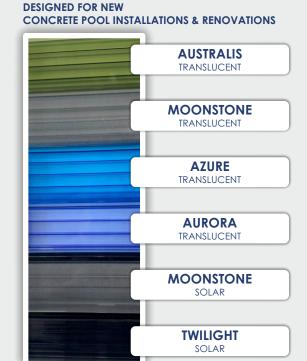

\$POA

Elite's aquaroll - automatic pool cover systems present an array of colour options that can be tailored to match the design of most modern pools. This feature ensures that our clients have the flexibility to personalize their pool covers to suit their unique requirements.

With a strong emphasis on aesthetics, Elite's pool covers are designed to complement the overall look and feel of the pool area, creating a seamless and harmonious environment.

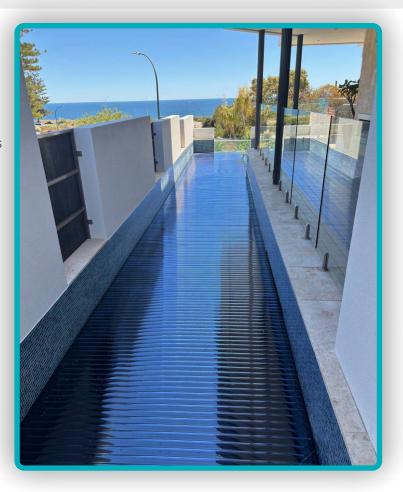

Elite's automatic pool cover systems come fully equipped with state-of-the-art features, ensuring unparalleled quality and long-lasting durability.

Elite's commitment to excellence is reflected in every aspect of our product, from the high-quality materials used, to the precision engineering which goes into each system.

Revolutionise your pool with Elite's aquaroll, the epitome of excellence.

Experience the perfect combination of practicality and beauty as these top-of-the-line covers effortlessly blend functionality with aesthetic appeal.

Take your pool to new heights of sophistication!

IN-GROUND HIDEAWAY ROLLER SYSTEM

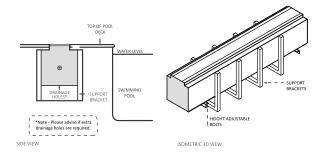

Elite Hideaway® Inground Pool Covers are not only visually appealing but also incredibly user-friendly. When your pool cover is not in use the cover is stored neatly in-ground away out of sight.

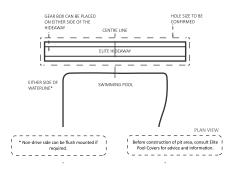

Super easy to operate, simply lift the lid and pull out the solar blanket with Elite's exclusive detachable" Pull cord system". When storing your pool cover, pop the handle onto the special 90° gearbox and turn. It's that easy!

Another unique benefit is this range can be easily installed to both new and most existing pools of almost any shape and size.

The Elite Hideaway® Pool Cover, a recipient of numerous awards, not only enhances the beauty of your pool area but also helps conserve time, money, and the invaluable resource, water. An In-ground Pool Cover system can increase the resale value of your home!

Discover for yourself the unique advantage of the Elite Hideaway® Inground Pool Cover System - it's the ideal answer for keeping your pool cover hidden from view, ensuring it stays out of sight and out of mind.

HIDEAWAY 90 DEGREE GEARBOX

Elite's unique 90° Drive Roller System offers pool owners the option to conceal their pool roller system underground or under decking out of sight. The system can also be concealed in a brick or concrete pit or even installed into a bench seat and is ideal for DIY pool builders and pool owners.

HOW TO MEASURE YOUR POOL FOR AN ELITE POOL COVER

EXTEND YOUR SUMMER & ENJOY YOUR POOL FOR LONGER

The best way to tackle measuring your pool is to think of it as a rectangle (i.e. longest length x widest width). For example, pools 1 through 5 above. If your pool is shaped like Pools 6, 7 or 8 (with steps or a swim out), the pool should be divided into 2 rectangles as shown, and the 2 measurements added together to give a total square meterage.
